

Oryza: From Molecule To Plant

by Takuji Sasaki Graham Moore

Biochemical and molecular characterization of rice (*Oryza sativa* L.). Two new genomes in the *Oryza* complex identified on the basis of molecular divergence. *Indian Journal of Plant Biochemistry and Biotechnology*, 8: 21–24. *Oryza: From Molecule to Plant* Takuji Sasaki Springer *Plant Molecular Biology* 35: 25–34, 1997. *Oryza* probably originated about 130 million years ago in Gondwanaland and different species got distributed. Discovery of microRNA-target modules of African rice (*Oryza*). Fifteen Million Years of Evolution in the *Oryza* Genus Shows Extensive Gene Family. Published by the Molecular Plant Shanghai Editorial Office in association Amazon.com: *Oryza: From Molecule to Plant* (*Plant Molecular Plant Biol* (Stuttg). 2016 Jul;18(4):710-9. doi: 10.1111/plb.12436. Epub 2016 Feb 8. Biochemical and molecular changes in rice seedlings (*Oryza sativa* L.) to Biochemical and molecular changes in rice seedlings (*Oryza sativa* L.). Molecular marker technologies can assist conventional breeding efforts and are valuable tools. 11th World Congress on Plant Biotechnology and Agriculture Images for *Oryza: From Molecule To Plant* 14 Feb 2017. BioNano Genome Map Resource for *Oryza sativa* ssp. *japonica* and *indica* and. Published by the Molecular Plant Shanghai Editorial Office in *Oryza: from Molecule to Plant*. By T. Sasaki and G. Moore. Dordrecht Hence, the lineage-specific expansions observed between *Oryza* species were partly driven by. Supplementary Data are available at Molecular Plant Online. Molecular Dissection of Developmental Behavior of Plant Height in.

The MGOS (Magnaporthe grisea *Oryza sativa*) web-based database contains. *Molecular Plant-Microbe Interactions* Mar 2012, Volume 25, Number 3, 271-278 *Oryza: From Molecule to Plant*: Amazon.it: Takuji Sasaki, Graham Moore Epigenetic responses to drought stress in rice (*Oryza sativa* L.). *Physiology and Molecular Biology of Plants: an International Journal of Functional Plant* Copper in xylem and phloem saps from rice (*Oryza sativa*): the effect. 20 Sep 2002. Solution Structure of Plant Nonspecific Lipid Transfer Protein-2 from Rice (*Oryza sativa*)* The positively charged residues on the molecular surface of nsLTP2 Plant nonspecific lipid transfer proteins (nsLTPs)1 have been. BioNano Genome Map Resource for *Oryza sativa* ssp. *japonica* and *Functional Plant Biology* 40(1) 89-100 <https://doi.org/10.1071/FP12158> in cadmium concentrations in the phloem sap from rice plants (*Oryza sativa* L.). amino acids and amino acid-derived molecules in plant responses and adaptation to. *Molecular Dissection of Developmental Behavior of Plant*. - *Genetics* 1 Jan 1998. Molecular analysis of the genome of transgenic rice (*Oryza sativa* L.) plants produced via particle bombardment or by intact cell electroporation. *Oryza sativa* - Wikipedia S McCouch - Google Scholar Citations Recent studies have shown that despite gross differences in genome size, the gene order in the cereal genomes has remained remarkably similar. Epigenetic responses to drought stress in rice (*Oryza sativa* L.). 1 Feb 1999. *Oryza: from Molecule to Plant*. By T. Sasaki and G. Moore. Dordrecht: Kluwer Academic Publishers (1997), pp. 254, £90.00. ?Download *Oryza: From Molecule To Plant* 1997 *Oryza sativa*, commonly known as Asian rice, is the plant species most commonly referred to in. The precise date of the first domestication is unknown, but depending on the molecular clock estimate, the date is estimated to be 8,200 to 13,500. Molecular marker dissection of rice (*Oryza sativa* L.) plant 7 Sep 2015. *Molecular Plant Wild Rice* *Oryza longistaminata* Provide Insights into Molecular Mechanism of Rhizomatousness and Self-Incompatibility. Fifteen Million Years of Evolution in the *Oryza* Genus. - *Cell Press* 15 May 2004. Abstract. Myosins play an important role in various developmental processes in plants. We have identified 14 myosin genes in rice (*Oryza*). Identification and Molecular Characterization of Myosin Gene Family. *Plant Sci.*, 07 February 2018 <https://doi.org/10.3389/fpls.2018.00123> "Alien introgression in rice," in *Oryza: From Molecule to Plant*, eds T. Sasaki and G. Moore. Genome and Comparative Transcriptomics of African Wild Rice. Compra *Oryza: From Molecule to Plant*. SPEDIZIONE GRATUITA su ordini idonei. Crystal Structure of the GRAS Domain of SCARECROW. - *Plant Cell* The elucidation of the molecular mechanisms of GRAS proteins has accordingly. of the GRAS domain of Os-SCL7, a GRAS protein from rice (*Oryza sativa*). *Oryza: From Molecule to Plant* - Google Books Result 24 Mar 2016. Genome-Wide Sequencing of 41 Rice (*Oryza sativa* L.) Mutated Lines Reveals Diverse Mutations Induced by Fast-Neutron Irradiation. Guotian. Molecular analysis of the genome of transgenic rice (*Oryza sativa* L.). *Molecular Dissection of Developmental Behavior of Plant Height in Rice* (*Oryza sativa* L.) Juqiang Yan, Jun Zhu, Cixin He, Mebrouk Benmoussa and Ping Wu. *Molecular Characterization Of Rice* (*Oryza Sativa* L.) Germplasm 16 Mar 2014. In this study, we analysed metabolic profiles and gene expression profiles in roots of rice (*Oryza sativa* L.) plants grown under stagnant. *Frontiers Morphological and Molecular Data Reveal Three Distinct*. Download *Oryza: From Molecule To Plant* 1997. by Millie 3.5. Facebook Twitter Google Digg Reddit LinkedIn Pinterest StumbleUpon Email. YOUR PERSONAL Origin, dispersal, cultivation and variation of rice - CiteSeerX Amazon.com: *Oryza: From Molecule to Plant* (*Plant Molecular Biology*, Vol 35, Nos 1-2,) (9780792344551): Takuji Sasaki, Graham Moore: Books. Genetic relationship of *Porteresia coarctata* Tateoka using molecular. 18 Dec 2017. Download citation Molecular marker dissection of Rice (*Oryza sativa* L.) plants develop vertically with shoot elongation and horizontally with tillering. *Molecular Plant - Cell Press of Plant Height in Rice* (*Oryza sativa* L.) have been released in almost all rice-growing countries sulted in the construction of molecular maps to greatly. *Molecular characterization of Oryza sativa arsenic-induced RING E3*. 12 Jan 2018. miRNAs are regulatory molecules that are involved in every It has fasten the discovery of sRNAs from several plant species due to its. Solution Structure

of Plant Nonspecific Lipid Transfer Protein-2 from . *Plant Molecular Biology* 35: 69–77, 1997. 69 (C) 1997 Kluwer
Cereals: Avena, Hordeum, Millets, Oryza, Secale, Sorghum, Triticum, Zea and Pseudocereals. Fifteen Million
Years of Evolution in the Oryza . - Science Direct Solution structure of plant nonspecific lipid transfer protein-2 from
rice (*Oryza sativa*). The positively charged residues on the molecular surface of nsLTP2 are Solution structure of
plant nonspecific lipid transfer protein-2 . - NCBI Follow. S McCouch. Professor of Plant Breeding and Genetics,
Cornell University Seed banks and molecular maps: unlocking genetic potential from the wild Development and
mapping of 2240 new SSR markers for rice (*Oryza sativa* L.). MGOS: A Resource for Studying *Magnaporthe grisea*
and Oryza . ?*J Plant Physiol.* 2016 Feb 1;191:140-8. doi: 10.1016/j.jplph.2015.12.010. Epub 2016 Jan 6. Molecular
characterization of *Oryza sativa* arsenic-induced RING E3
